Installing Dealer

Read this document in its entirety before planning your configuration.

Plan ahead and make sure your installation is a great success! Remember to check the latest information on these products and make sure that the following items are available prior to installation.

- Verify dedicated power source and check for stability. The MX-6580N/7580N Document Systems require a 208-240 VAC, 60 Hz, 20 Amp power source.

The MX-6580N/7580N main unit requires one 208-240 VAC, 20 Amp power source.

The MX-FN21, MX-FN22 and MX-LC13N options each require separate 120 VAC, 15 Amp power sources.

- Confirm that you have the latest firmware available from www.sharp-pcservice.com to upgrade your MX-6580N/7580N Color Document Systems immediately.
- Some accessories require a product key for operation. You should obtain the accessory Application Code and machine's serial number to register the product key online prior to arrival at the customer location.
- Check to see if MySharp™ online training is set up for the end-user.
- Verify that the customer has enough supplies on-hand to complete a large rush job. After-hours printing and/or holiday work may take place following an installation. See Supplies & Accessories list on the following page.
